## SUMMARY

Software Developer with experience building and deploying full-stack web and mobile applications using React, React Native, Node.js, Express.js, PostgreSQL, MongoDB, and TypeScript. Skilled in developing responsive user interfaces, REST APIs, authentication systems, database-driven applications, and scalable backend services. Experienced in shipping production-ready products and optimizing application performance.

## TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, PHP, Java
- **Frontend:** React.js, Next.js, React Native, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI
- **Backend / Databases:** Node.js, Express.js, Springboot, REST APIs, PostgreSQL, MongoDB, MySQL, Firebase, Supabase
- **Developer Tools:** Git, GitHub, Postman, Vercel, Render, Netlify, CI/CD, Figma
- **AI / Automation:** Machine Learning, Prompt Engineering, RAG, AI APIs, N8N

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                               |                            |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|
| <b>Junior Software Developer   Techhub</b> <ul style="list-style-type: none"><li>• Promoted from trainee to full-time Software Developer based on project performance.</li><li>• Building React Native and React applications for production use cases.</li><li>• Developing scalable features and backend integrations across client projects.</li></ul>                                                                     | <b>Mar 2026 – Present</b>  |
| <b>Full Stack Developer Intern, Remote   Brandverse Technologies India Pvt. Ltd.</b> <ul style="list-style-type: none"><li>• Engineered 6+ MERN stack features end-to-end, accelerating release cycles by 30–40%.</li><li>• Architected reusable React component systems across 4+ modules, reducing UI rework.</li><li>• Defined and exposed 8+ REST APIs with Redis caching to enhance response times under load.</li></ul> | <b>Jul 2025 – Dec 2025</b> |
| <b>Software Development Engineer &amp; Prompt Engineering Intern, Remote   Asvix</b> <ul style="list-style-type: none"><li>• Integrated frontend and backend services for an AI healthcare platform supporting 100+ users.</li><li>• Executed OAuth-based authentication with email verification, maintaining 99.9% uptime.</li><li>• Tuned Next.js App Router, SSR, and Firebase schedulers across 15+ routes.</li></ul>     | <b>Jun 2025 – Sep 2025</b> |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                            |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|
| <b>Part-Time Freelancer — Mobile &amp; Web App Development</b> <ul style="list-style-type: none"><li>• Delivered 8+ client projects end-to-end spanning mobile and web applications across diverse industries.</li><li>• Built cross-platform mobile apps using <b>React Native (Expo)</b> and web apps using <b>React.js</b> and <b>Next.js</b>.</li><li>• Handled full project lifecycle — requirements, design, development, deployment, and client handover.</li></ul> | <b>2024 – Present</b>      |
| <b>Prompt2Code — VS Code Extension</b> <ul style="list-style-type: none"><li>• Developed a VS Code extension providing AI-based code suggestions and editor assistance.</li><li>• Integrated external AI services to generate context-aware responses from user input.</li><li>• Implemented core features using VS Code Extension API with focus on reliability.</li></ul>                                                                                                | <b>Feb 2025</b>            |
| <b>CodeDale — Frontend Web Application</b> <ul style="list-style-type: none"><li>• Developed a scalable React frontend with reusable components across 5+ pages.</li><li>• Refined UI responsiveness and layout consistency using Tailwind CSS.</li><li>• Streamlined navigation and internal linking, improving engagement and tool adoption by 10+ users.</li></ul>                                                                                                      | <b>Nov 2025</b>            |
| <b>NeuroHub — Neurodiversity Support Platform</b> <ul style="list-style-type: none"><li>• Built an accessibility-first full-stack platform with real-time progress tracking.</li><li>• Established secure authentication and backend workflows.</li><li>• Recognized as a finalist at GDG Campus Hackathon among 50+ teams.</li></ul>                                                                                                                                      | <b>Mar 2025 – Jun 2025</b> |

## EDUCATION

|                                                                                      |                            |
|--------------------------------------------------------------------------------------|----------------------------|
| <b>SRKR ENGINEERING COLLEGE</b><br>B.Tech — Computer Science and Design (CGPA: 8.24) | India<br>Expected May 2026 |
| <b>SMT. B. SEETHA POLYTECHNIC</b><br>Diploma — Computer Science (Percentage: 78.31)  | India<br>2020 – 2023       |

## ACHIEVEMENTS

|                                                                                                     |                    |
|-----------------------------------------------------------------------------------------------------|--------------------|
| <b>Finalist</b> – GDG Campus Hackathon, NeuroHub (50+ teams)                                        | <b>2025</b>        |
| <b>Production Delivery</b> – Multiple production-ready systems across internships & freelance roles | <b>2025 – 2026</b> |
